

STEPHEN D. EULE

Stephen D. Eule is the Director of the Climate Change Technology Program in the Office of Policy and International Affairs at the U.S. Department of Energy. Mr. Eule also manages DOE's participation in the Climate VISION program and the Asia-Pacific Partnership on Clean Development and Climate, and he represents the Department at various international fora on climate change.

Before joining DOE in June 2003, Mr. Eule spent a decade working in various public policy positions. He spent a number of years in the U.S. House of Representatives, first as a professional staffer and then subcommittee staff director, with the Committee on Science and then as legislative director in the personal office of Representative Nick Smith (R-MI). He also served in Christie Todd Whitman's Washington Office as an environmental analyst. Previous to that, he spent about eight years with The Orkand Corporation as an energy consultant to the Energy Information Administration. His experience also includes a stint with the Heritage Foundation, where he was assistant editor on the book *Free Market Energy*.

Mr. Eule earned a master of arts degree in geography from The George Washington University and a bachelor of science degree in biology from Southern Connecticut State College.
